

Freeskiing is a sport that has a lot to do with the environment. This is true not only for places we ride, but also the equipment we use. As a ski-manufacturing company we cannot emphasize enough that Majesty skis' cores are made tip to tail of wood. To achieve that perfect flex and extreme durability on our skis, we use ash and poplar wood of best quality. This is why here at Majesty Skis, we all care about trees - they are not only metaphorical lungs of our planet but also the true hearts of our skis.

As an environmentally conscious freeski company, we are aware that green areas on our planet are shrinking rapidly. We would now like to encourage all skiers to appreciate and respect the beautiful environment we all enjoy while riding the slopes. Therefore, we decided to launch the "SKIS 4 TREES" project.

The idea is very simple - with every pair of Majesty skis you buy, we plant a tree on your behalf! Trees for skis with "SKIS 4 TREES" - this is how it works.

We are aware that this might be just a small step, but it is our goal to inspire people to care about the environment.

It is a win-win situation - you can now enjoy your brand new pair of Majesty skis and support local efforts to protect nature. Our planet deserves it.
